DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art searched and cited failed to teach or fairly suggest a specimen holder for an electron microscope, having a rod-shaped part with a tip arranged to receive a specimen, held by clamping means, wherein first temperature control means are provided to control the temperature of the rod-shaped part and/or the clamping means such that this rod-shaped part and the clamping means substantially have the same temperature, at least at the location of their contact surfaces in combination with the remaining elements of claim 1. Claims 2-14 are allowable because of their dependencies upon claim 1.
3. The prior art searched and cited failed to teach or fairly suggest an assembly of an electron microscope and a specimen holder wherein the electron microscope is provided with clamping means for holding the specimen holder in the electron microscope, the specimen holder comprises first temperature control means to keep at least a part of the specimen holder being in contact with these clamping means substantially at the same temperature as the clamping means in combination with the remaining elements of claim 15.

4. The prior art searched and cited failed to teach or fairly suggest a method for reducing thermal drift in an electron microscope, having the following steps: placing a specimen on the specimen holder; fixing the specimen holder in the electron microscope in clamping means suitably provided in the electron microscope; adapting the temperature of the specimen holder and/or the clamping means so that both obtain and keep substantially the same temperature as disclosed in claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All of the references cited on attached PTO 892 contain art similar to that being claimed by applicant.
